Working for more than 21 years

Trading House «Medical Gas Service» Co. Ltd. founded in 1999. The company is engaged in the production and sale of medical and technical gases.

Who are we?

Our company is the only manufacturer of nitrous oxide (means of inhalation anesthesia) on the territory of the Russian Federation. Main types of our goods:

- **nitrous oxide** (medical, technical, food)
- **liquid carbon dioxide** (carbon dioxide)

Our goods

N₂O

Nitrous Oxide (Dinitrogen oxide)

Registration number LS-001797, Registration date 20.10.2011
Manufactured according to the Pharmaceutical Norms and Regulations 42-0604-6483-05, with the amendments.

Certification: Certificate of conformity € ROSS RU.HX05.H00775
Active substance: nitrous oxide with a base substance content of at least 98%.
Pharmaceutical form: compressed gas.

Packing: 6.2±0.2 kg in carbon steel cylinders according to GOST 949-73 with a capacity 10 litres with the screwed on safety caps and protective rings.
Packaging in cylinders of smaller and larger capacity is allowed with customerTs preferences.

Usage: the mean for inhalation anesthesia, only for the stationary usage.

N₂O

Nitrous Oxide (food)

Manufactured according to the Technical Conditions 2114-002-52025268-2012

Certification: Certificate of conformity € ROSS RU.HX05.H00746

Packing: 6.2±0.2 kg in carbon steel cylinders according to GOST 949-73 with a capacity 10 litres with the screwed on safety caps and protective rings.

Usage: for cooling, freezing and storing food products in direct and indirect contact with them, a preservative product.

N₂O

Nitrous Oxide (technical)

Manufactured according to the Technical Conditions 2114-001-52025268-2012

Certification: Certificate of conformity € ROSS RU.HX05.H00745

Packing: 6.2±0.2 kg in carbon steel cylinders according to GOST 949-73 with a capacity 10 litres with the screwed on safety caps and protective rings.

Usage: in the welding industry, in the electronics industry, for analysis and preparation of high-purity gases, for the operation of internal combustion engines.

CO₂

Liquid carbon dioxide (carbon dioxide)

Manufactured according to the GOST 8050-85, with the amendments.

Certification: Certificate of conformity € ROSS RU.HX05.H00776

Packing: In a tank for regulatory and technical documentation for vehicles.

Usage: for creating a protective environment when welding metals; for food purposes in the production of carbonated beverages, dry ice, for cooling, freezing and storing food products in direct and indirect contact with them, for drying casting molds, for fire protection and another purposes in all industries other goals.
